TweetX

Tweet it, Mint it

Limitations of current Twitter

❌

Tweets can be **removed** or **edited**

🤝

Web 2.0 social media by a **centralized actor**
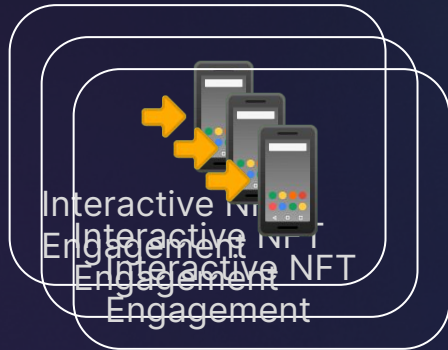

➡️📱

Not interoperable

Our solution

A decentralized platform to back up any tweet as an NFT

Dynamic & evolutionary NFTs

Simply use its ID

Use cases

Interactive NFT
Engagement

Interactive
Engagement NFT

Interactive NFT
Engagement

Business model

DAO manages a wallet to finance the mint

Stake governance tokens to increase NFT's update frequency
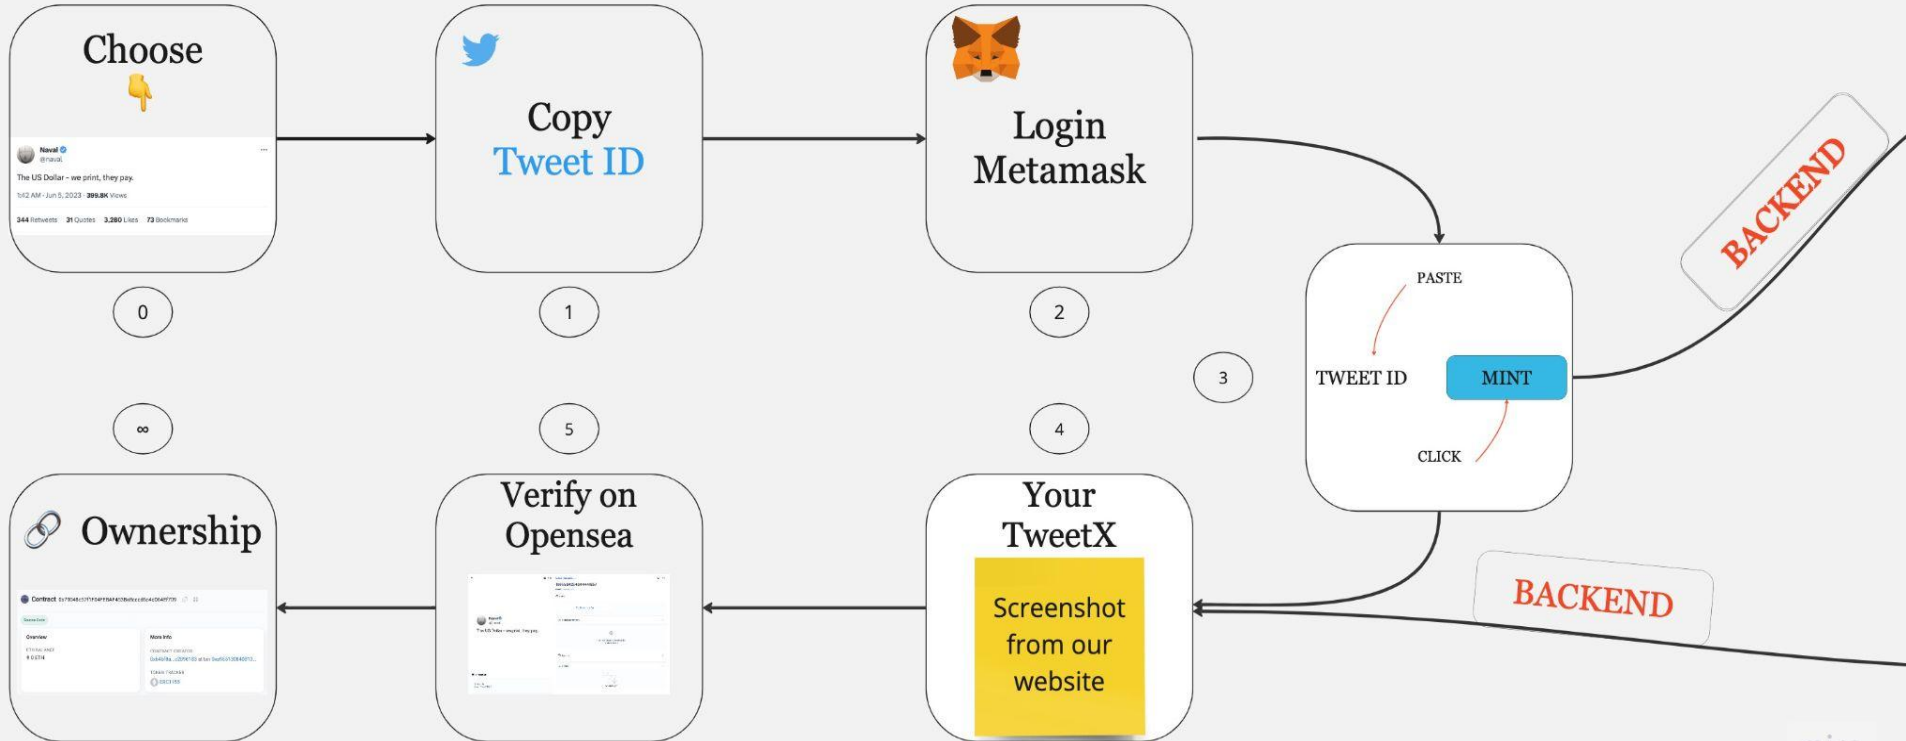

Blue check ?

big companies ?

Personalized avatar for burn of tokens

         Display data      Treatment of      Call MINT
         from IPFS in  ←   JSON File     ←   Function
         Twitter-like      contained on      in TweetX
         Format            IPFS Link         Contract

                  Future Development
```
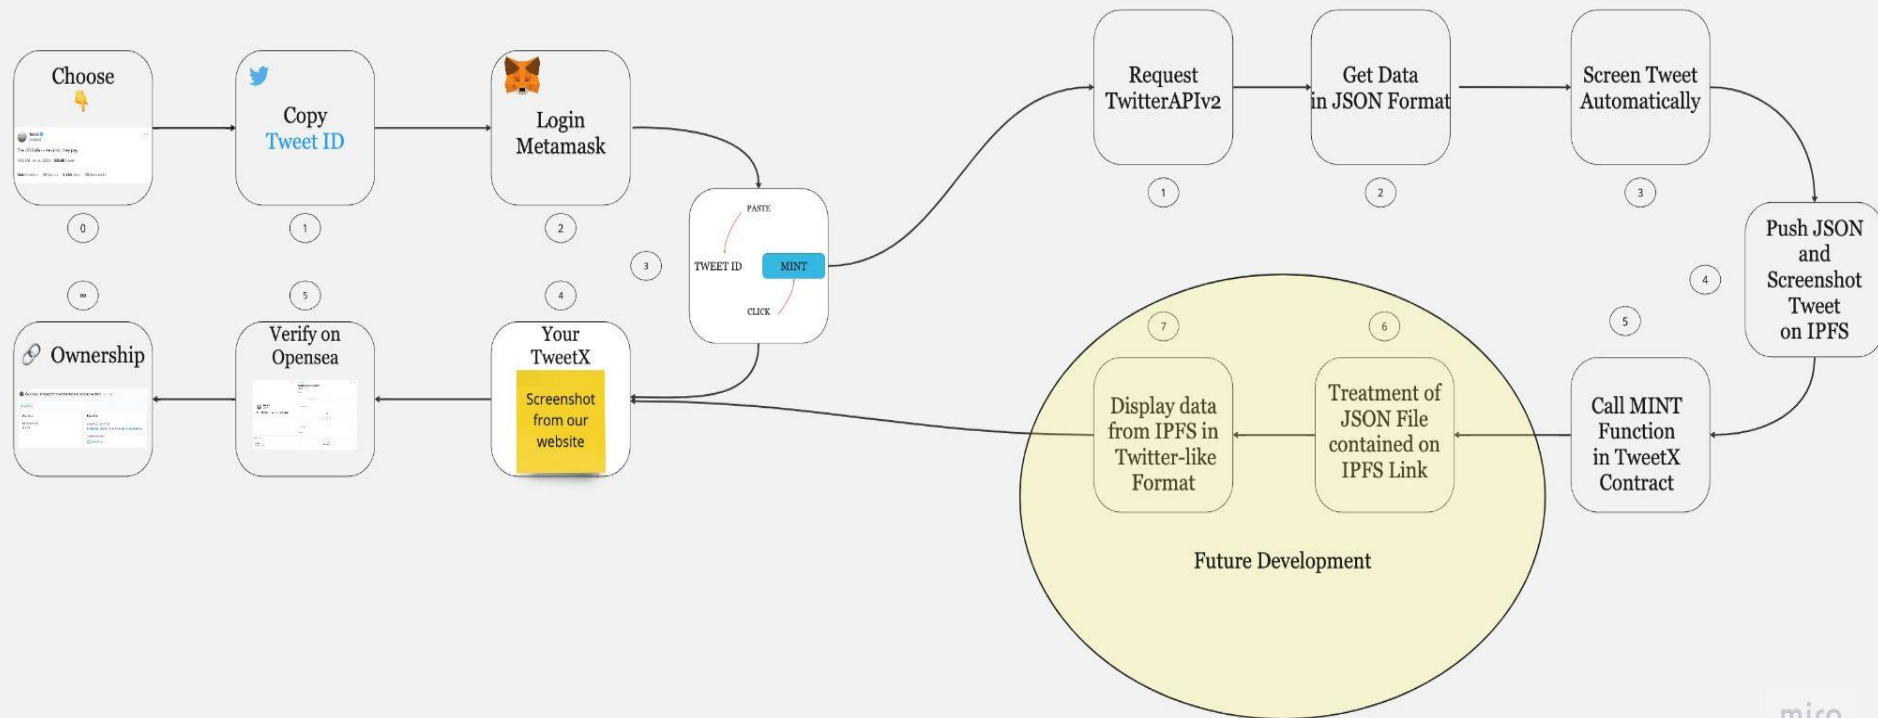

# ARCHITECTURE

Technical Foundations

Frontend in React and Typescript

OpenZeppelin-based custom ERC 1155 implementation

NFT data fully stored on IPFS for true decentralization

ChatGPT Integration

ROADMAP **TweetX**

TweetX
Tweet it, Mint it

Technical Improvements

Q3-Q4 2023

Parsing JSON from TwitterAPI to build our **proprietary interface**. **Oracle implementation** to deploy on network.

Feature Implementation

Q1 2024

Make Tweet **dynamic** and **interactive** on our Interface.

DAO Creation

Q2-Q3 2024

To manage the future of the **algorithm** and **incentivisations** rules.

Financial & Community Building

Q4 24 - Q1 25

Financial incentivisations and community building. **Engaging community** through **gamification** and **twitter communities**

Acquisition By ELON MUSK for 1M ETH

Q2 2025

Not too expensive ! 😉

Integrate this feature in Twitter (X Platform).

Live demo

01 Check the Tweet
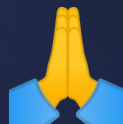

02 Like it !

03 Be amazed !

Acknowledgement

🙏 **Thank you very much**

To Kim, Alexandre, Matthias, Zaki, Shane, Jasper, Alexandra and Bruno for your HELP and for the organisation 💪
